## EUROPEAN PRICE REPORT

Issue 06/07  
June 2007

*The European Fish Price Report, based on information supplied by industry correspondents, aims to provide guidance on broad price trends. Price information is indicative and FAO is not responsible for any errors or omissions. Prices are used to show medium to long-term trends.*

### INDEX FOR PRICES

Groundfish	6
Flatfish	7
Tuna	7
Small Pelagics	7
Cephalopods	8
Crustaceans	8
Bivalves	11
Salmon/Trout	12
Freshwater fish	12
Non Traditional Species	13
Seabass	13
Seabream	14

European import prices, as reported by correspondents, are showing initial signs of a weaker trend in several product categories. A number of frozen groundfish fillet prices, including Alaska pollock and cod, are lower than May levels while increased supplies of wild turbot have resulted in lower prices for large farmed product. A strong Illex season in Argentina has contributed to weaker prices in certain frozen squid segments and prices are reported softer for farmed warmwater shrimp due to stronger supplies in some Asian countries. Other reported prices appear stable this month while the positive trend in frozen tuna prices continues.

### LATEST TRENDS

Frozen groundfish fillet price indications are stable to declining compared to last month. Several Alaska pollock dollar prices, delivered Europe, are weaker following a period of relative stability with skinless

#### Alaska pollack\* and Surimi\*\*

\*In Europe, origin: USA/Russian Federation; \*\*In France

boneless fillets of US origin down 3% to US\$2.85/kg while Russian fillets are marginally lower at US\$2.78/kg. These prices represent lows for the previous six months. South American hake fillet prices, on the other hand, are stable in dollar terms with the exception of *M. productus* fillets from the USA for which a 2% increase is reported, to US\$2.45/kg. Euro indications for European produced fillets are also stable to declining with Atlantic cod fillets down slightly to €5.90/kg and saithe fillets from Norway and the Faroes stable at €2.43/kg. On

the other hand, Norwegian export figures for the January-May period point to a positive price trend for frozen saithe fillets this year with converted unit values for May at around €2.67/kg, well above the five month average of €2.29/kg.

## FLATFISH

Weak wild turbot prices in Spain have undermined the relatively high price levels for large farmed turbot which have been reported since October last. Average cif (Spain)

prices for 3-4 kg farmed fish are down 13% on May indications to just under €15/kg. Average prices for small to medium grades are in line or slightly up on last month. Increasing stocks of large farmed turbot, due to stronger wild supplies, are likely to maintain downward pressure on prices until the wild season winds down at the end of June.

## TUNA

The world frozen tuna market continues to be dominated by a supply shortage, high demand and record high prices. Frozen yellowfin reached EUR1 830/tonne CIF in Thailand and EUR1 825/tonne DDP in Spain. In Fiji, the price of yellowfin loins reached US\$4 800/tonne CIF; in Europe, it reached US\$6 350/tonne CIF (origin: Indian Ocean). The prices of frozen skipjack tuna in Bangkok hit an all-time high level by reaching US\$1 250/tonne, which represented a rise of US\$150 compared with the previous month. According to industry sources, expanding demand and declining catch levels tightened the inventories of processors, particularly in Thailand. In Ecuador, skipjack was also traded at US\$1 250/tonne; therefore, prices of skipjack loins in Spain are expected to remain at more than US\$4 000/tonne DDP. With increasing pressure on profits, the future trend of prices will depend on whether canners will be able to pass on the increased costs of raw material as higher prices to the large retail chains.

## PELAGICS

With the exception of the matjes herring trade, European herring and mackerel markets are reported seasonally quiet. Price indications, cip the Russian Federation, for both round herring and herring flaps are unchanged on last month while mackerel

### Herring - In Norway, origin: Norway

and herring sales levels, influenced by low stock levels and recent warmer temperatures, remain weak. This pattern is expected to continue until the start of the new season in the autumn.

## CEPHALOPODS

Good Argentinean *Illex* landings combined with stock carryover from 2006 are adversely affecting prices both for *Illex* products and for competing squid products. Weaker prices, cfr Europe, are reported for jumbo squid tubes, particularly in the smaller size grades, from Peru. Average prices are down over 20% on April indications for the 100-200gr grade while the 200-400gr grade is down 14%. In contrast, prices for larger sizes in the 600-1000gr range are stable to increasing due to weaker supplies. Limited supplies have also lifted prices for medium and larger sizes of round seafrozen *Loligo* squid from South Africa. Cif (Spain) indications for these grades are up 3% on last month and, with poor fishing prospects for the remainder of the current season, prices are expected to remain at current high levels in this market segment.

### Squid - In Italy, origin: South Africa

## CRUSTACEANS

### Coldwater shrimp (Pandalus borealis)

Peeled, in UK, origin: Norway

Comments from correspondents refer to a weakening in black tiger prices but largely stable *Pandalus* prices compared to last month. Increased supplies due to the start of the Thai harvest season are contributing to lower farmed shrimp prices in Asia with prices, cfr Antwerp, for Indonesian black tiger shrimp generally lower this month. In the coldwater segment, price indications, ddp UK, are broadly stable for peeled

and cooked *Pandalus* of Norwegian origin. A small 2-3% increase, to £2.05/lb, is reported for the 100-200/lb grade compared to May.

## SALMON

**Salmon - In Europe, origin: Norway**

Fresh salmon prices in the European market are continuing their downward trend initiated last month but do seem to have reached some sort of plateau with good demand in some markets actually leading to higher prices. Norwegian export volumes are record high this year but prices are not surprisingly much lower than the record levels seen last summer. In the Jan-May period of 2007, Norway exported 231 000 tonnes of salmon, an increase of 22% compared to the same period of last year. Average export prices per kilo were NOK 30.83, down 8 % from 2006.

Scottish salmon prices have firmed for the smaller sizes up to 3 kg whereas the larger sizes are stable.

## SEABASS/SEABREAM

The bass and bream market seems to approach its seasonal peak with bass prices still firming but the smaller bream sizes (200-300gr) starting to decrease. Prices are expected to remain firm until serious quantities of the new production come to market, probably during the month of July. Demand is still good despite some reduced purchases in the larger cities as the schools start closing for the summer break.

**Seabass and Seabream - In Italy, origin: Greece**

The European Fish Price Report is a monthly GLOBEFISH publication, prepared by Karine Boisset and Gerry O'Sullivan - with contributions from Audun Lem and Camillo Catarci

It can be ordered from the **FISH INFONetwork:**
